Naturvillan creates extraordinary living spaces with light and openness, the opportunity to live in an eco-friendly environment, harmoniously integrated with your own sheltered garden. Homes extend summer and promote sustainable living in a luxurious garden setting aiming for a minimal environmental footprint and inspire through possibility.

All houses are equipped with reliable, energy-efficient solutions, eco-friendly materials, protective climate shells, automatic irrigation systems, and ecocycle systems that recycle nutrients from wastewater back into the garden plants. In winter – warm and cozy, whereas in summer – spacious and abundant. Always functional, always beautiful.

A unique building, stable on the ground yet reaching for the sky, the Atri home offers fantastic living spaces filled with natural light, providing the opportunity to live in an eco-friendly environment, seamlessly blending with your sheltered garden. Designs allow for easy expansion, offering flexibility as needs change over time. With much of the outdoor garden shaped by nature, entering in a garden through a greenhouse with a breathtaking, high ceiling filled with light and fresh air. Park your electric car and connect it to your personal energy grid, generating power for home or to store for later use.

The entry hall is spacious, providing easy access to the next floor, which includes bedrooms, a bathroom, a balcony, and a library. The user can climb to the roof terrace to breathe in the fresh air, relax, and take in the expansive view. The design maximizes the landscape's natural beauty, offering
