As part of the SPACE10 residency program, design research lead Esteban Gómez visited Vereda Granizal — an informal settlement in Medellín, Colombia with a population of around 30,000 people and 5,000 houses. There, he met with community members, academia researchers working on the site, architects as well as government representatives and private organisations. In the film, they are interviewed with the aim to better understand and give context to the everyday lives of the inhabitants.
