Authorship: Interview by [Marta Bugés](#). Sound edition by Joan Climent Roca.

For centuries, architecture and gender has been a silent debate but in the last decades there has been a very fruitful conversation about how design can have biased implications. This has awoken the need to find which strategies can lead to the building of more gender inclusive cities.

Inés Sánchez de Madariaga, director of the UNESCO Chair on Gender and professor of urban planning at Technical University of Madrid, talks about designing a gender inclusive urban environment and women in participatory processes.
