VIVOOD is the brainchild of the young entrepreneurial architect Daniel Mayo. In the wake of his successful opening, in 2009, of VivoArquitectura, an architectural studio specializing in beautifully designed small-scale projects, and deeply committed to environmental conservation, Daniel embarked on a scientific study of architectural sustainability.

“VIVOOD Eco-Friendly Accommodation” is the result of that investigation. These folding units, with their unique patented design, have been brought to life in the form of “landscape hotels” in a natural setting: VIVOOD Landscape Hotels. The first of these unique properties is set in the unspoiled Valley of Guadalest.

VIVOOD's most important added value is the natural landscape that surrounds it. To protect and preserve this asset, the management implements strategic strategies:

- Restoration and care of the landscape
- Adaptation to the terrain
- Foundations are removable and concrete-free
- Use of local materials with a low carbon footprint
- Use of water-saving cleaning systems
- Low-consumption lighting
- Renewable energies such as solar panels
- Only electric service vehicles are permitted to access the site
