Refurbishment and extension of the building in the Plaza de Puerto Rubio for the Save The Children Foundation, Madrid.

The building for [Save The Children Foundation](#) is a strategic point in the San Diego neighbourhood for the social work that this NGO carries out in the Vallecas area. The project involves the refurbishment and extension of the current building so as to address the needs of a child care centre. The proposal is based on adding a new body that is suspended over the existing structure. This extends the building and configures a new façade, as well as a new communications and service core.
