Stardust*. Ephemeral Arts Connection
<https://urbannext.net/stardust-ephemeral-arts-connection/>

The book aims to reflect about the relation between space, matter and time.

Everything is ephemeral, because everything is subjected to the flow and transformation of life. Buildings, cities, all forms of artworks. In every Stardust* project the ephemeral is conceived as the link between the contemporary arts. The reflection is related to the transformation of materials, their origins, application, cycle of life, recycling and death.

The ephemeral is able to be a new experimental paradigm for sustainable/empathic development through innovative, collaborative and interdisciplinary processes of design and production. The new technologies in fast evolution applied in the Stardust* projects help out on prefiguring a new global model of development.
